CAREER OBJECTIVE

Entry-level Python Developer with hands-on experience in data analysis, machine learning, and deep learning projects. Proficient in Python, Pandas, NumPy, and CNN-based models, with a strong foundation in OOP and data structures. Seeking an opportunity to contribute analytical and problem-solving skills in a growth-oriented organization.

Education

Prof Ram Meghe College of Engineering and Management B.E in Computer Science and Engineering — CGPA: 7.93/10.0	2020 - 2024
Late Jijamata Sabhane College of Science, Wardha (HSC)	2018 - 2020
New English High School, Wardha (SSC)	2017 - 2018

Skills

Programming Languages : Python
Data Analysis : Pandas, NumPy, Exploratory Data Analysis (EDA)
Machine Learning : CNN, Image Classification, Data Preprocessing
Tools : Jupyter Notebook, Google Colab, Visual Studio Code, Git
Platforms/Datasets : Kaggle, Sales Datasets

Projects

Potato Plant Disease Detection and Classification using Machine Learning

Python, Deep Learning (CNN), NumPy, Matplotlib.

- Developed a CNN-based deep learning model to classify potato leaf images into Healthy, Early Blight, and Late Blight categories.
- Used the Kaggle PlantVillage dataset (2,152 images) with image preprocessing, resizing (256×256), and dataset splitting (70:30, 80:20).
- Achieved 97 Percent training accuracy and 92 Percent validation accuracy, demonstrating strong model performance and generalization.
- Applied image processing and data preprocessing techniques to support early plant disease detection and improve agricultural outcomes.

Diwali Sales Data Analysis

Technologies Used : Python, Pandas, NumPy, Matplotlib

- Conducted exploratory data analysis (EDA) on Diwali sales data to uncover customer purchasing patterns and sales trends.
- Cleaned and preprocessed the dataset by handling missing values, removing irrelevant columns, and performing data type conversions using Pandas.
- Analyzed customer demographics (gender, age group, marital status, occupation, and state) and visualized insights using Matplotlib and Seaborn.

Certifications

Python Developer Training and Certification – Naresh IT, Hyderabad

- Strong foundation in Python programming and core software development concepts.
- Hands-on experience with Pandas and NumPy for data manipulation and numerical analysis
- Developed analytical and problem-solving skills through Python-based projects.
- Followed clean coding practices, proper documentation, and industry-standard development workflows

Strength/Interpersonal Skill

- Hands-on experience in Python-based data analysis, exploratory data analysis (EDA), and machine learning through academic and real-world projects.
- Strong ability to interpret datasets, visualize insights, and derive actionable conclusions for technical and business use cases.
- Collaborative team player with strong problem-solving skills, a continuous learning mindset, and high attention to detail.
